

PAYROLL SOLUTIONS Ltd

Payroll Solutions Ltd. provide a complete, cost effective PAYE & CIS payment administration service.

The payroll solutions provided are tailored to their customers needs, with a very friendly and high quality service.

Payroll Solutions Ltd wanted to upgrade their website but was held back by the need to directly change the coding rather than maintaining the site using a Content Management System (CMS). Additionally, multiple domains were being used that needed bringing together.

Lisa commissioned Formability to convert the website into a CMS system, to improve the site with a number of changes and to continue supporting the website.

Working closely with Lisa, Formability rebuilt the website to meet the business requirements so that the website content is now easily managed providing an overall simplified implementation.

Lisa Loonan, Managing Director of Payroll Solutions Ltd. says “Paul and the team have been fantastic in collating all my domains and sorting out multiple email addresses to simplify things and also rewriting my website. They kept me informed and consulted closely with me all the way through the transition process, so I knew exactly where we were up to at all times. I am really pleased with our new website and the services provided. I would recommend Formability for their speed, professionalism, friendly staff and very competitive prices“.
